Education

McGill University

Jan 2020 – Dec 2025

Bachelor of Engineering in Computer Engineering (GPA: 3.80 / 4.00)

Montreal, Canada

- **Awards:** 1st Place – Databricks AI Agent Hackathon Montreal; Broadsign Award – CodeJam XI
- **Scholarship:** J.B. Woodward Scholarship

Experience

Full-Stack Developer

May 2025 – Dec 2025

Wholesale Express

Montreal, Canada

- Led UI refactor across 10+ pages for the platform's v2 upgrade, restructuring the frontend into reusable Vue/Nuxt components and removing 6,000+ lines of boilerplate, resulting in a more modular and maintainable codebase
- Optimized 5+ GraphQL queries on high traffic inventory pages by eliminating overnested and redundant calls, resulting in ~10% lower API latency and faster vehicle data fetches across 300+ daily listings
- Built a public vehicle info page with vehicle-specific shareable links sent via email, enabling 3,000+ registered dealerships to share live inventory with non-registered clients without requiring sign-up

Backend Engineer

Mar 2025 – May 2025

ContainerFoam

Montreal, Canada

- Integrated Google Document AI to parse 3 cocktail recipe books (~3,000 recipes) into structured entries with ~95% accuracy, reducing ingestion time from days to under 5 minutes per book
- Designed a 12-table PostgreSQL schema with a Node.js backend and AI recommendation engine using OpenRouter DeepSeek V3, filtering 3,000+ recipes by user inputs (ingredients, allergies, mood, and flavor) before querying the model to generate fully personalized cocktail recipes

Credit Risk Analyst Intern

Apr 2024 – Jul 2024

CI Guarantee

Seoul, South Korea

- Evaluated credit risk for 3,300+ partner companies by processing financial documents (bank statements, income sheets, cash flow reports, etc.) through the internal rating system, flagging 200+ erroneous submissions for re-submission to support loan and insurance decisions on projects up to \$1M USD
- Handled 30+ client calls daily, guiding companies through document submission requirements and explaining credit ratings to both technical and non-technical stakeholders

Communications and Intelligence Marine

Sep 2022 – Mar 2024

Republic of Korea Marine Corps

Seoul, South Korea

- Led a 15 marine unit through recurring week-long war simulation exercises focused on establishing antenna systems and maintaining signal communication channels, formally evaluated on speed, signal strength, and inter-unit coordination
- Served as the sole interpreter in joint US-Korea command centers alongside generals, facilitating up to 10 briefings daily with zero miscommunication incidents, earning the USMC Commandant Coin (Standout Performance Award)

Projects

RecycleWise | *React.js, JavaScript, Supabase, REST API, CI/CD*

- Engineered a multi-step item-matching flow for a recycling platform that filters 30+ Montreal recycling centers by category, material, size, and condition, directing users to the best drop-off location via Google Maps
- Designed a QR code-based recycling verification system and points-based rewards engine across four user roles (guest, user, business, admin), secured with Supabase Row Level Security and deployed to production on Vercel with CI/CD integration

WhenAreYouFree | *Nuxt.js/Vue.js, Express.js, Prisma, PostgreSQL, Bun, Azure DevOps, Docker*

- Directed development as project manager and full-stack developer on a 3 person team, building drag-to-select availability, custom cross-timezone calculation, and unique per-session shareable links in Vue/Nuxt and Express.js
- Implemented secure authentication and REST APIs with Prisma ORM, containerized the app with Docker, and set up a CI/CD pipeline on Azure DevOps for automated deployment

MenuLens | *React.js, Python, OpenCV, OpenAI API*

- Developed an AI-powered menu digitization system using OpenCV OCR and OpenAI API with prompt engineering, allowing real-time menu translation, currency conversion, dish image generation, and dietary filtering via an AI chatbot with 97%+ parsing accuracy

Technical Skills

Languages: Python, Java, JavaScript/TypeScript, SQL(PostgreSQL), HTML/CSS

Technologies: React.js, Vue.js/Nuxt.js, Flask, Spring Boot, Node.js, Express.js, Prisma ORM, Pandas, Numpy, Linux, Git
